Good morning,

As you might recall, there was a mention of personal information about a Trustee during the announcements at the close of the January 16, 2018 regular board meeting. It was realized after the meeting adjourned that this personal information shouldn't be available publicly on YouTube and the Board informally asked that this part of the video recording be edited as it didn't contain Board business. However, upon further review of Policy 1053 Recording Board Meetings, it is clear that "Each recording shall have date and time coding and shall not be edited for content." Thus, I believe the correct step to take here is for the Board to formally vote to approve the editing of the video recording. Furthermore, it might be wise in the near future to change Policy 1053 to allow editing under very specific and special circumstances. Jo and I have briefly discussed this issue and we both feel it is something the Board should at least consider.

Thanks,
Ryan
