Good morning,

It may be necessary to pass an ordinance to appropriate more funds into the Telephone & Internet line of the Corporate Fund. As you will recall, the Board allocated more funds to the budget this year in order for us to update our telephone system. This was not anticipated during budget planning for FY 2020-2021 and thus we are a little bit short in our appropriation in that line item. That said, we have enough appropriated overall in the Corporate Fund, so it may not be necessary for the Board to adopt an ordinance to address this issue. I am in the process of working with Roger Ritzman on this and will have a solution by Tuesday evening. In the meantime, this will be a placeholder on the agenda if it is determined to be necessary.

Thanks,
Ryan
