Good morning,

Attached is Policy 3020 with the changes discussed during the June Committee of the Whole meeting. I did verify that the Emergency Connectivity Fund equipment will be able to be renewed up to three times. I did investigate what data we had regarding specific patron usage of our WiFi hotspots, but, as I suspected, our library automation system does not collect that data for privacy reasons. However, I am working with the Circulation Team to make sure we can justify changing the circulation periods for our non-ECF hotspots. I will have additional information and context to provide next Tuesday evening.

Thanks,  
Ryan
